2 November 1973

MEMORANDUM FOR: Director of Central Intelligence

SUBJECT: Tactical/National Intelligence Interface

1. Attached is an agreement between myself and Admiral Hannifin, the DOD representative named by Dr. Schlesinger on the tactical/national interface issue.

2. This agreement is more forthcoming than I thought it might be. I was half-expecting that the DCI and SecDef would have to get together to override JCS resistance.

3. The JCS has, in fact, already made an inventory of tactical assets which, if it survives the JCS coordination system, will represent a considerable forward step in the disclosure to the DCI of assets over which he should have cognizance. I will let you know when I receive any indications that the JCS paper might be castrated.
